CORRESPONDING WITH US

Besides written correspondence and telephone calls, we can be reached by facsimile (fax) machine and by electronic mail (e-mail). Any of these methods are acceptable for responding to information requests you receive from us. Also, we always welcome your comments, questions, and concerns.

When using e-mail, please use the message part of the e-mail to include any documents that would normally be attachments. This may help ensure the transmitted information is readable when we receive it. We have had less than favorable results in receiving attachments to e-mail. If you must send attachments, we would recommend that you convert them to DOS ASCII format first. Most word processing programs can save documents as DOS ASCII text.

The following is a list of our staff members, their telephone numbers, and e-mail addresses. Also shown are the telephone numbers for the fax machines in the Regulatory and Testing Sections:

ISTA INTERCONVENTION MEETING

Dr. Richard C. Payne of the Seed Regulatory and Testing Branch (SRTB) attended the International Seed Testing Association (ISTA) Interconvention Meeting in Budapest, Hungary, from April 6 through 11, 1997. The Interconvention Meeting, held one year prior to the triennial ISTA Congress, is attended by the ISTA Executive Committee and chairpersons of the ISTA Technical Committees.

This meeting serves as a planning session for various ISTA activities. Among the items discussed were the following: (1) ISTA's quality assurance program and plans for reaccrediting existing member laboratories; (2) plans for the next ISTA Congress to be held in Pretoria, South Africa, in April 1998; (3) progress reports of technical committee activities; (4) steps that could be taken to make the technical committee more productive; (5) harmonization of the ISTA and Association of Official Seed Analyst rules for testing seed; and (6) possible rule proposals to be voted on by the ISTA members at the 1998 ISTA Congress. The proposals include the accelerated aging test for soybean and the conductivity test for peas as well as limiting to thirty the maximum number of primary samples that must be drawn from a seed lot.

FEDERAL SEED SCHOOL HELD

The SRTB conducted a Federal Seed School in Beltsville, MD, during the week of April 21-25, 1997. Botanists David Bitzel and Susan Maxon of the SRTB's Testing Section provided instruction to 21 seed analysts during the week-long course. Besides the 14 participants who came from seed laboratories of 6 State departments of agriculture (Hawaii, Maryland, New York, North Carolina, South Carolina, and Virginia) and SRTB laboratory technician Leigh Wiltison-Allen, participants included 5 seed analysts from 4 commercial seed laboratories located in 3 states (Idaho, Illinois, and Texas) and a member of the staff from Alabama A & M University. The topics taught were selected to suit the interests of the participants and included purity testing, seed identification, noxious-weed seed examination, tetrazolium testing, and germination testing of species commonly tested by the participating laboratories.

We regularly provide training for seed analysts as part of our function to promote uniformity in seed testing under the FSA. If you are interested in being host to a future seed school, please contact Dr. Richard C. Payne (301-504-8089).

INSPECTOR TRAINING WORKSHOPS

As part of a two-day seed inspector workshop held by the Utah Department of Agriculture for their inspectors and other seed regulatory officials, the SRTB conducted a training session explaining the Federal Seed Act (FSA) and the cooperative relationship between State and Federal seed regulatory programs. The training workshop was held in Salt Lake City on March 18 and 19, 1997. Twenty inspectors and officials from Utah's program attended.

The Oklahoma Department of Agriculture conducted inspector training sessions on March 25 and 26, 1997, in Henryetta and Weatherford, OK. At each location, the SRTB conducted training explaining the FSA and the cooperative Federal/State relationship. A total of 32 inspectors and officials from the Oklahoma seed program attended 1 of the 2 training sessions.

Our part of the programs included an open-forum slide presentation covering sampling procedures that comply with FSA requirements, an overview of the FSA, seed labeling requirements, documentation needed for the SRTB to process FSA complaints, and the types of enforcement actions the SRTB takes under the FSA. The effect on seed enforcement of the 1994 amendments to the Plant Variety Protection Act was explained. Handouts were given to each participant which further explained the topics covered in the verbal presentation.

The States and USDA participate in seed regulatory enforcement by virtue of a Federal/State Cooperative Agreement. The SRTB relies heavily on the States for sampling and testing of interstate shipments of agricultural and vegetable seeds. Each inspector's performance is critical to the success of the cooperative program.

For information about inspection training, please contact the seed marketing specialist assigned to your region. That information is shown on page one.

RYEGRASS FLUORESCENCE LIST

This is the ryegrass fluorescence list from the National Grass Variety Review Board (NGVRB). The NGVRB has added 6 experimental perennial ryegrasses to the list since our last issue.

FEDERAL SEED ACT CASES SETTLED

Listed below are cases settled under the FSA from January 1 through March 31, 1997. All cases were settled administratively. Under the administrative settlement procedure, the SRTB and the firms agreed to settle the cases for the amount specified with the firms neither admitting nor denying the charges:

- Advance Seed Company, Fulton, KY, has paid \$1000 for a case involving 5 shipments of seed. The alleged violations, while not the same for all shipments, were false labeling as to the variety name and failure to show required information for a seed component in a vegetable mixture, failure to properly label vegetable seed germinating "less-than-standard," and false labeling as to germination percentage and test date. Seed regulatory officials in Arizona, Oklahoma, and Virginia cooperated in the initial sampling and inspection.
- AMPAC Seed Company, Tangent, OR, has paid \$800 for a case involving 3 shipments of seed. The alleged violations, while not the same for all shipments, were false labeling as to purity and noxious-weed seeds and failure to show the required labeling for a seed component. Seed regulatory officials in Missouri, Nebraska, and Virginia cooperated in the initial sampling and inspection.
- Farmer's Gin Company, Clinton, KY, has paid \$1200 for a case involving 6 shipments of seed. The alleged violation, for each shipment, was sale of non-certified seed of a protected variety requiring certification. Seed regulatory officials in Kentucky cooperated in the initial sampling and inspection.
- Ferry-Morse Seed Company, Modesto, CA, has paid \$300 for a case involving a shipment of seed. The alleged violations were false labeling as to variety name and failure to keep required records. Seed regulatory officials in Texas cooperated in the initial sampling and inspection.
- Olean Seed Company, Olean, MO, has paid \$1650 for a case involving 5 shipments of seed. The alleged violations, while not the same for all shipments, were false noxious-weed seed labeling and failure to label the presence of noxious-weed seeds and to keep required records. Seed regulatory officials in Alabama, Illinois, and North Carolina cooperated in the initial sampling and inspection.
- The Sexauer Company, Brookings, SD, has paid \$1650 for a case involving 5 shipments of seed. The alleged violations, while not the same for all shipments, were mislabeling noxious-weed seeds and purity factor totals, false purity and variety labeling, and failure to label the name and required information for a seed component. Seed regulatory officials in Maryland, Missouri, Nebraska, Tennessee, and Virginia cooperated in the initial sampling and inspection.
- Willamette Seed Company, Albany, OR, has paid \$900 for a case involving 3 shipments of seed. The alleged violation for all shipments was false purity labeling. Seed regulatory officials in Kentucky and Missouri cooperated in the initial sampling and inspection.

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, DC 20250, or call (800) 245-6340 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.
